CONVEYING

GEBO AQFLEX®

Flexibility at the heart
of your performance

With the packaging industry facing increasingly sophisticated consumption trends that present various challenges to the production and distribution of goods, Sidel is responding with a radically new approach to conveying and accumulation.

Gebo AQFlex® is a breakthrough product handling technology delivering unprecedented packaging line performance, unique agility and smooth contactless product conveying and accumulation in a very compact space. Together, let's build the factory of the future.

HIGH PERFORMANCE

Optimize your performance while reducing your costs.

Gebo AQFlex® delivers a secured production with unrivaled performance and unprecedented capability.

- **Availability:** 99.5% efficiency whatever the speed
- **Wide speed range** up to 100,000 containers per hour
- **Greater product traceability** thanks to 100% true First In, First Out (FIFO) operating principle
- **Continuous infeed and outfeed**
- **Seamless packer infeed:** lane-guided, jam-free interface with packing equipment

TOTAL FLEXIBILITY

Diversify your production without compromising the quality of your packaging solutions.

Gebo AQFlex® offers a unique agility, freeing product innovation

- **Full flexibility:** handles all container materials, formats and shapes
- **Product integrity:** smooth and contact-free single-lane handling and accumulation of the products
- **Suitable for fragile and unstable containers:** premium, odd-shaped and lightweight bottles
- **Fast automatic changeovers** (no change parts) through intuitive and user-friendly HMI

MAJOR SAVINGS

Save space for a minimized TCO and an optimized operability.

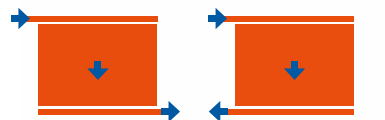

Sidel responds with Gebo AQFlex® whose compact form-factor sets a new standard in the industry.

- **Waste reduction:** contactless handling preserving product integrity
- **All-in-one solution** with no need for other conveying functions
- Up to **70% energy savings**
- **Extreme compactness:** up to 40% space savings compared to traditional solutions
- **Shortest packer infeed:** Jam-free and seamless interface with packing equipment
- **Low maintenance needs:** simple design
