OPTIMAL WARMER

WARMING YOUR PRODUCTS IS ESSENTIAL TO OPTIMIZE QUALITY AND THE LABELLING OF YOUR PRODUCTS. HAVING A GOOD WARMER MEANS MAKING SURE TO AVOID CONDENSATION WHEN THE FILLING TEMPERATURE OF THE PRODUCT IS MORE OR LESS CLOSE TO THE TEMPERATURE OF THE PACKAGING HALL.

WE HAVE DESIGNED EVOWARM TO BRING YOU OPTIMAL WARMING WHILE OFFERING REDUCED CONSUMPTION AND EXCELLENT COMPACTNESS FOR A REDUCED TOTAL COST OF OWNERSHIP.

LOW CONSUMPTION

EvoWarm improves the profitability of your line thanks to:

- Advanced software providing predictive output temperature control
- New spraying system, reducing electrical consumption, while avoiding risk of clogging
- Heating of the water without spray systems activation until production start

HIGH COMPACTNESS

EvoWarm was designed to reduce the space requirement:

- Low height for easy transport: 1.2 m
- Electrical cabinet on the roof, improving footprint

OPTIMIZED ERGONOMICS

EvoWarm allows safe and comfortable cleaning and maintenance of the machine:

- Ergonomic access to the tunnel through removable side panels, on tanks side
- Ergonomic access to infeed and outfeed through sliding doors
- HMI with : advanced diagnostics and troubleshooting support
